RELOCATION OPERATIONS PLATFORM

Every move. One clear view.

One system for removal and relocation companies — from the first enquiry and the survey to packing, transport, storage, delivery, invoicing and the books. Built for the office, the crew on site and the customer.

Sales leads & quotations
AI video inventory
Surveys
Pickup & packing
Box labels with QR
Warehouse
Transport & delivery
Customer self-service links
Invoicing & multi-currency
26 accounting reports

See the volume before you quote

Film a walk-through; get items by room, fragile pieces, boxes needed and expected CBM.

Run every job on one screen

Crew, materials, labels, working hours, photos, sign-off and money — per job.

Know what each move earns

Costs and income flow to the ledger; profitability per pickup, packing, delivery or job.

FROM ENQUIRY TO DELIVERY

The whole move, in one connected flow

Each step picks up the details of the one before — customer, address, inventory and price — so nothing is typed twice and everyone works from the same record.

1 · Sales lead

Capture enquiries with move type, origin, destination and dates; assign a salesperson and plan follow-ups. Record a walk-through video on the spot or send the customer an upload link.

Follow-up statuses · Customer upload link · AI inventory & CBM

2 · Survey

Room-by-room survey with your household items master, box types and packing materials. Trip clock, travel expenses, photos and a customer review link to confirm what was surveyed.

Room inventory · Volume & boxes · Customer confirmation

3 · Quotation

Turn the survey into a priced quotation with your charges and taxes. Share it by link — the customer can accept, reject or ask for a re-quote online.

Charge & tax masters · Online acceptance · Printable designs

4 · Pickup & packing

Schedule the crew, pack and label every box, track the materials used and record payments and expenses. Customers confirm the date, share their location and approve the packed items from their phone.

QR box labels · Materials & cost · Working hours · Signatures

5 · Warehouse

Receive boxes from pickups or the office, store them with photos and documents, and release them for shipment when the customer is ready.

Receipts · Storage records · Attachments

6 · Transport & delivery

Plan trips and vehicles, track shipments and package hand-overs, then deliver: crew, delivery notes, collections on the doorstep, and links for the customer to confirm the date and share the location.

Trips & fuel · Shipment tracking · Delivery notes

7 · Billing & accounts

Raise invoices and bills, record receipts and payments in any currency, and let the accountant post everything to the ledger from one queue.

Multi-currency · Posting queue · Profit per job

WHAT SETS IT APART

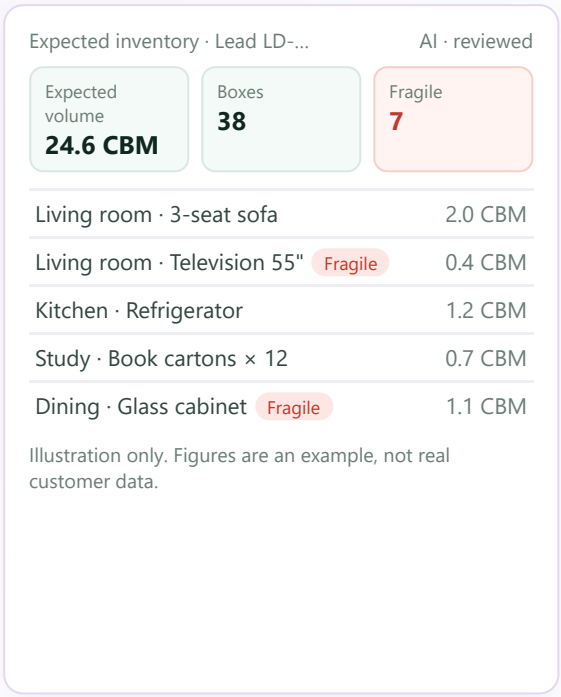

Less typing in the office. Fewer surprises on the day.

AI VIDEO INVENTORY

Film the home. Get the inventory.

Your salesperson — or the customer — records a walk-through and talks about what they see. The system takes still pictures from the video, transcribes the narration and asks OpenAI for a draft inventory.

- Items by room, with quantities
- Fragile pieces and special handling (crating, dismantling)
- Boxes needed, using your own box types
- Expected CBM, using your household items master
- Stored on the lead, editable, with the AI cost of every run

Customer self-service links

Secure links let customers upload photos and videos, accept quotations, confirm the packing date, share their exact GPS location and confirm the packed items — no app, no login.

Box labels that track

Print 4×6 labels with the box number, QR tracking code, room and contents as you pack. See which boxes still need a label and reprint any time.

Crew time you can trust

Start, pause with a reason, resume and complete. Working hours per job and per crew member, trip clocks with distance, photos before and after, and on-site signatures.

Receipts on every expense

Snap a photo of the fuel or parking bill straight from the phone. The accountant sees the receipt next to the expense before posting it.

Crews, teams and schedules

Employees, designations, crew roles and teams; assign people to surveys, pickups, packing and deliveries and see who is where.

Your documents, your design

Built-in report designer with your logo and address on every quotation, receipt, label, packing list and accounting report.

FINANCE BUILT IN

From the doorstep to the balance sheet

Money collected and spent in the field lands in the accountant's posting queue. Nothing is posted twice, every posting can be reversed with an audit trail, and each move's profit is one click away.

- ✓ **Invoices, bills, receipts and payment vouchers** per pickup, packing, delivery, warehouse or job
- ✓ **Credit and debit memos** with automatic reversal postings
- ✓ **Multi-currency** with exchange-rate snapshots and a fixed accounting base currency
- ✓ **Accountant posting queue** for field receipts and expenses, with receipts attached
- ✓ **Packing material cost** posted automatically when a job is completed
- ✓ **Labour, transport and vendor costs** allocated to each move
- ✓ **Profitability** by pickup, packing, delivery, warehouse receipt or job
- ✓ **Customer and vendor statements**, ageing and outstanding balances

26 accounting reports, ready to print or export

Trial balance · Profit & loss · Balance sheet · Cash flow · General ledger · Journal register · Cash & bank book · Receivable ageing · Payable ageing · Invoice register · Bill register · Receipt register · Customer advances · Expense & revenue analysis · Currency exposure · Tax summary · Posting & reversal audit · ...and more

Multi-company

Several companies under one account: shared customers and masters; separate books, numbering, letterhead and reports.

Roles & audit

Role-based permissions and a full activity log of who changed what.

Cloud ready

Web app on any device; files kept privately in your own Amazon S3 bucket.

Your rules

Your statuses, charges, taxes, box types, items and document designs.

See it with your own jobs

We'll set up a company for you with your box types, charges and a sample move, so your team can try it end to end.
